

October 2023; here we are with the fourth and final newsletter of this year.

In general, the month of October brings to mind the onset of autumn, shorter days and Halloween... but October has also been European Cybersecurity Month for 11 years now.

To mark the occasion, we are dedicating this newsletter to data protection. Find out our latest news on the subject, as well as upcoming events.

Did you know?

Phishing, ransomware, malware... The number of cyberattacks continues to rise; in 2020, 180,000 incident tickets were opened with the CIRCL (Computer Incident Response Center Luxembourg), compared with 100,000 in 2019 and 15,000 in 2018.

These figures underline the importance of strengthening our data protection, as well as the usefulness of dedicating an entire month to cybersecurity awareness.

Data Protection at Labgroup

With the growing number of cyberattacks, secure storage of your data has become essential.

Data Protect, one of our data protection solutions, goes far beyond the creation of back-ups.

"It's a unique software solution, coupled with physical servers, which combines threat identification, data replication and archiving tools, artificial intelligence and massive data recovery functions," explains Yannick Pissel. The use of a physical device, of hardware, enables us to back up hundreds of servers, and to duplicate and store tens of terabytes of data very quickly."

Save the date!

Come and meet us at these two data protection events in November.

Luxembourg Internet Days will take place on 7 and 8 November.

With the number of cyberattacks targeting institutional organisations and private companies having exploded in recent years, the theme of this year's event is Network Security and Resilience.

The programme includes conferences, interactive workshops and round-table discussions to address, in a technical and pragmatic way, the main challenges posed by the Internet.

Come and meet us on our booth at the Luxembourg Chamber of Commerce.

It's the perfect opportunity to discuss your data protection projects, or simply to meet us and our partner Cohesity.

For more information and free registration, click here:

We are also delighted to be working with Luxembourg House of Cybersecurity (LHC) to organise a CyberSecurity Breakfast.

When? On 23 November 2023, from 9.00 a.m. to 10.15 a.m.

Where? On the premises of LHC - 122, Rue Adolphe Fischer, L-1521 Luxembourg

On the agenda:

Join us for a keynote focused on Data Resilience, followed by a round table discussion.

Considering the growing number of cyberattacks and the new upcoming regulation frameworks such as DORA, system and data resilience is becoming the new challenge that every company will have to tackle in the near future. Labgroup's solutions can help you mitigate your risks and provide you with ease of mind for both your data protection and disaster recovery.

On top of this, we strongly believe that resilience should not only focus on production systems, but should also take into account Electronic Archiving as part of your data resilience plan.

Let's talk about it.
